

veterans managing this challenging condition.

Throughout my time in Congress, I have paid close attention to effective alternative therapies for the symptoms of PTSD, from service dogs to equine therapy, from book and writing groups to yoga and acupuncture. A group in my home State of Maine, called K9s on The Front Line, has created an extraordinary model. At no cost to the veteran, volunteer police dog handlers teach participants to train their own dogs or dogs selected from shelters to be PTSD service dogs.

Many of these veterans have had years of therapy or drug treatment with limited success. Yet, in so many instances, the impact of these service dogs on both veterans and their families has been nothing short of miraculous.

I am proud to honor my constituents at K9s on The Front Line for improving the lives of Maine veterans with PTSD.

TECHNICAL EDUCATION

(Mr. DESJARLAIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DESJARLAIS. Mr. Speaker, today I rise to recognize the importance of technical education.

Technical education allows Americans of nearly any age to gain practical skills for the modern economy. Students graduate with less debt and also great career prospects because growing industries often partner with local education centers to find the best employees.

My home State of Tennessee, where global auto companies have created a network of high-tech manufacturers, is a prime example. This week, in Franklin County, we are celebrating the groundbreaking of another Tennessee College of Applied Technology campus. The program has been enormously successful across the State, helping Tennesseans who prefer to learn a trade to find meaningful work and helping employers to fill specialized jobs.

I applaud President Trump for his focus on apprenticeship and vocational programs to create jobs and economic growth. This week, I voted to simplify Federal funding for States, which administer a broad range of programs for everything from mechanics to coding. I have also voted to lift Federal restrictions on overdue energy and infrastructure projects requiring thousands of engineers and operators.

The United States must always be an industrial leader. That leadership starts with hardworking Americans pursuing their passions through technical education.

TAX REFORM

(Mr. GOTTHEIMER asked and was given permission to address the House for 1 minute.)

Mr. GOTTHEIMER. Mr. Speaker, I rise today to speak out against dark-

of-night policymaking and extreme partisanship and turn to where we can work together with civility on our most pressing issues.

Instead of focusing on what we do not agree on, we must work together where we can find common ground on cutting taxes for hardworking Americans and businesses of all sizes and investing in the crumbling roads, tunnels, and bridges Americans drive over every day. In New Jersey, our roads are the eighth worst in the country, while our taxes are way too high.

As co-chair of the bipartisan Problem Solvers Caucus, I have been working around the clock with both parties since I was sworn in to fix our roads, while lowering taxes and cutting unnecessary regulation and red tape. By doing so, we can increase economic growth in jobs, improve safety, fight terror, ensure clean drinking water, stand by our vets and first responders, and give our country a competitive advantage on the world stage.

We simply can't have a first-rate nation with second-class infrastructure and sky-high taxes. There is political will on both sides of the aisle on these issues, but we can't be spending our energy on rehashing the same tired partisan debates and jamming through partisan bills. We must work together to get things done for the American people.

CELEBRATING THE LIFE OF STAN McETCHIN

(Mr. LAMALFA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAMALFA. Mr. Speaker, I rise today to commemorate the passing and celebrate the life of a good friend to many, Mr. Stan McEtchin. Hailing from Vancouver, British Columbia, Stan passed away on June 9, after 92 years of enriching the lives of those around him.

For the past few decades, the small town of Paradise, California, has known Stan as a pillar of the community, whose sculpted metal artwork decorated shops and houses all across Butte County. But before his creative artwork made him a local celebrity, Stan served his country in World War II.

In 1943, he volunteered for the First Special Service Force in the Canadian Army, an elite American and Canadian commando unit that preceded the modern Special Operations Forces we have today. In 2014, the man beloved for his artwork and for his charity was awarded a Congressional Gold Medal right here in Washington, D.C., for his unit's heroism in battle.

I consider myself fortunate to have known him just a little bit, and our country fortunate to have gained such a good man from our northern neighbors.

God bless his family and his memory.

TRUMPCARE, BUT AT WHAT COST?

(Mr. PAYNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PAYNE. Mr. Speaker, Senate Republicans have negotiated their TrumpCare bill in the dark, and that is just where it should have stayed. And just wait until the CBO score comes out next week.

Knowing that this bill will cause immeasurable harm to millions of American families who will lose their coverage and protections while facing higher costs, I do not understand how anyone could support it.

We constantly hear from our Republican colleagues that TrumpCare keeps their promise to repeal the Affordable Care Act. So you keep that misguided promise, but at what cost?

We are talking about the lives of real people, millions of real people. Aren't they worth more than just a tax cut for the rich?

Mr. Speaker, I urge my Republican colleagues to scrap this disastrous bill. Let's work together to improve the Affordable Care Act and not destroy it.

CAREER AND TECHNICAL EDUCATION PROGRAMS PROVIDE STUDENTS OPPORTUNITIES FOR TODAY'S ECONOMY

(Mrs. HARTZLER asked and was given permission to address the House for 1 minute.)

Mrs. HARTZLER. Mr. Speaker, I rise today to speak in support of today's legislation to advance our country's career and technical education programs. These programs help students learn the skills needed to be competitive and set our young people on the path to success.

I have visited with our manufacturers regularly, and they have repeatedly told me that more skilled workers are needed.

As a former vocational teacher, I have seen firsthand the fulfillment a student can find from getting real-world training in a useful skill, and I am encouraged by the positive steps this bill takes to address this skill shortfall.

There are many paths to success, and the Strengthening Career and Technical Education for the 21st Century Act helps us pave the way for a high-skilled workforce of Americans to have successful, fulfilling careers.

LGBT PRIDE MONTH

(Ms. JAYAPAL asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. JAYAPAL. Mr. Speaker, all over the country, millions of Americans are celebrating Pride Month and our LGBTQIA communities across the country. In fact, this week I will join tens of thousands of Washingtonians at our annual Seattle pride events.
